February 26, 2001

The Department of Water Resources is pleased to invite you to participate in the first meeting of the Land Use, Land Management and Aesthetics Work Group associated with the relicensing of the Oroville Facilities (Federal Energy Regulatory Commission Project No. 2100). The meeting is scheduled for:

**March 13, 2001  
6 p.m. - 9 p.m.  
The Eagles Hall  
2010 Montgomery Street  
Oroville, California**

DWR envisions utilizing a three-tiered collaborative process (Plenary Group, Work Groups, and Task Forces) to relicense the Oroville Facilities, where interested individuals can actively participate in the process at whatever level they choose. DWR expects that much of the collaboration and productivity in the process will occur at the Work Group level. Work Group participants will address resource-specific issues and be involved in development of solutions and recommendations for presentation to the Plenary Group. The Plenary Group will provide a global perspective and seek balance between resource plans.

Involvement at the Work Group level will require a strong commitment to attend regularly scheduled meetings. Participants will work collaboratively to discuss issues related to a specific resource, evaluate existing information, identify additional information needs, design study scopes, evaluate study results, and develop solutions *and recommendations for consideration by the larger Plenary Group.*

The Land Use, Land Management and Aesthetics Work Group will be actively involved in developing goals and objectives leading to the development of a Land Use, Land Management and Aesthetics report that DWR will ultimately submit to FERC as part of the license application. This first meeting will focus on organization, structure and method by which the Work Group will address all issues and interests related to land use, land management and aesthetics concerns raised during the relicensing process.
